

Mousumi Das, Indian Institute of Astrophysics

I have very fond memories of visiting the GMRT as an observer many years ago, during my observing runs. I really enjoyed being in the computer room where all the assistants managed the scripts and seeing how it was actually done. It was also a great experience to actually visit the antennas on the site. The low frequency data I have received using the GMRT has been invaluable to my career and to that of my collaborators and students. So I am very grateful to the GMRT staff, scientists and generally all the people that have made it possible for me to use the GMRT.
