

Kamini Shevgaonkar, Performing artist & Film maker

To NCRA,

This is Kamini Shevgaonkar here - Performing artist and a film maker from Mumbai.

I was associated with NCRA for the MWSKY2 conference held in March 2019.

I was the cultural curator for the event and had a made a biopic documentary on Dr. Govind Swarup and the team and the journey of telescopes in India which was screened then.

The film can be viewed on YT : Link :

<https://www.youtube.com/watch?v=AwP0TMm-UNE>

During my film research, I learnt how GMRT was built then - with the amazing team of researchers spearheaded by Dr. Swarup in the early 90s. The kind of infrastructure, the construction and the gigantic /mammoth project which was accomplished in that decade was nothing short of a miracle. I was introduced to a new fascinating field :)

I consider myself fortunate to be a part of this project then.

As GMRT celebrates 20 yrs today, I want to congratulate the entire group for the amazing scientific contribution in the field of radio astrophysics in India.

A visit to the GMRT site @ Khodad is on my wishlist :)

thank u,

Kamini
