

Paul Wiita, The College of New Jersey

Both the concept and execution of the GMRT were triumphs for Indian science and engineering. In the 80's and 90's I made frequent visits to what evolved into NCRA/TIFR, first in Bangalore and then in Pune, I recall visiting the site before, during, and after construction. The excellent scientific results that have emerged from the data collected at the GMRT have made a real difference to our understanding of the universe.
