

Tiziana Venturi, INAF, Istituto di Radioastronomia

On this special occasion I wish to gratefully thank the many colleagues and friends who have helped, supported and welcomed me in Pune and India throughout many years. You have made the GMRT a big part of my professional and personal life, and each single visit, whether for observations or meetings, has been a wonderful and fulfilling experience. Working with the GMRT staff has been, and still is, a privilege. The contribution of the GMRT to astrophysics has been enormous, in several different areas, and a lot still has to come now that we have entered the new enthusiastic times in preparation to the SKA. I wish the most successful future to the full GMRT team.
